INCREASE VENTILATION TO HELP
#STOPTHESPREAD
THE CDC RECOMMENDS
Increase Outdoor Air Ventilation Rates
Since carriers of infectious diseases, such as small particles and aerosols, can be airborne, removing them via building ventilation can be a powerful tool in mitigating transmission.

RenewAire’s Energy Recovery Ventilation (ERV)

INCREASED VENTILATION is vital for diluting indoor air contaminants and decreasing disease transmission rates.

ERVs REDUCE VENTILATION ENERGY COSTS (UP TO 65%)

Read what the experts (CDC, OSHA, ASHRAE, REVHA) have to say about ventilation in the fight against COVID-19:
